Education

West Hawaii explorations academy

May 2023

High school diploma

Mount Wachusett Community College

Sep 2025 - Current

Project

ClaudeAPI JSON to DB Tool – Call's ClaudeAPI to intellegently match data sets from JSONS to SQL

- . Error handling and scalability for future projects.
- . *Learned SQL & JSON integration in GO for backend development.*
- . *Understanding of ClaudeAPI & its documentation to effectively utilize in project scope.*

Sorting Algorithm Visualizer - Demonstrates sorting algorithm principles

Dec 18 – Dec 28, 2025

- . *Understanding and use cases of sorting algorithms.*
- . *Implementing efficient and light-weight graphical solutions from scratch.*

Personal Website - Work in progress

Nov 13, 2025 – Current

- . *AWS & load time optimizations.*
- . *In depth vanilla CSS/HTML styling & animations.*
- . *Fundamentals & utilization of JavaScript for improved functionality in HTML & CSS.*

2048py – a 2048 clone made in Pygame with detailed graphical effects

Dec 26, 2025 – Current

- . *Animations and VCR effects.*
- . *Graphical optimizations for ModernGL.*
- . *Implementation of low level features for advanced game logic.*

Chaos Crashers game – a hack and slash written in go using the Ebitengine

Dec 11, 2025 – Current

- . *Using OOP to run game logic, track progress/stats, drive enemy AI.*
- . *Use & knowledge of the Ebitengine framework and its documentation.*
- . *Documenting and maintaining codebase to be legible and easy to understand.*
- . *Utilizing the Ebitengine framework to implement higher level game engine features.*

Front-End: HTML, CSS, TypeScript, Github, Ebitengine.

Back-End: Python, Golang, C++, git, Linux, MariaDB, SQL, API's, JSON

Soft Skills: Understanding & approachable, enjoys organizing and optimizing daily tasks. Eager to learn and asks for direction not answers when stuck.
